Personal Profile

I am a student in Swansea University, I am now embarking on my second year of study. Prior to University, I did volunteer in Repair IT for 2 years I became very used to communicating with a large range of people. I am planning to find a year in industry placement where I will put into practice what I am learning so far at university, being advantageous for any company I work for in the future.

Skills

- Phone Speaking – I answered phones frequently and discussed issues with customers in 2 years of voluntary experience.
- Teamwork – I worked alongside Mr Orders with a customer management system to delivery products to fulfil customer satisfaction.
- Communication – In my Welsh Baccalaureate project, I made a mental health app, designs of which I had to communicate clearly with my group.
- Adobe Suite – Due to my A levels in photography and ICT, I have much experience in Photoshop and many other adobe suite items.

Educational Summary

University – Swansea University (2021 – 2025)

At Swansea I am currently studying Software engineering in my second year, in my first year I believe I stood out with an average course mark of 72% and a mark on CS-110 (Programming 1) of 96%.

Secondary School – Maesteg Comprehensive School (2014 – 2021)

Accomplished A levels:

- ICT – A at Maesteg Comprehensive School
- Computer Science – A at Bryntirion Comprehensive School
- Photography – B at Maesteg Comprehensive School

Accomplished GCSEs:

Achieved 8 A grade GCSEs and 2 B grade GCSEs at my main secondary school.

Additional Information

- Full UK driving license
- The Google Hash Code for 2022 – My group came 116th in the UK.
- Royal Institution Mathematics KS4 Masterclass (March 2018)
- CyberFirst NCSE Defenders (August 2018)
- CyberFirst NCSE Futures (August 2019)

Interests

- Photography – I am very passionate about how the world looks and this has encouraged me to take many photos of the world around me, especially things like macro photography, which I find particularly beautiful.
- Programming – Programming is something I have been doing from young age from curiosity of how things work, and I believe I have fashioned this from something as a casual interest to a possible career choice.
- Teaching – I am thoroughly interested to teach as I take great pleasure in finding interesting new ways to convey information and seeing the spark when someone finally understands a topic is extraordinary to me.
